

CARBON X

CARBON TAX SOLUTION

A software solution to meet the demands of South African carbon tax accounting and reporting to DEFF and SARS.

A joint venture between Cova Advisory, specialists in carbon tax and Xnovos a software company specialising in accounting software.

Calculations updated for changes in the carbon tax legislation by Cova Advisory, giving you peace of mind that your calculations are compliant with the legislation.

Supporting your carbon tax lifecycle from journal to SARS tax return, providing a complete solution and one version of the truth within your organisation.

Features:

1. Monthly tax calculations per source per facility
2. Carbon tax journals to be processed to accrue for expense and liability
3. Greenhouse Gas Report (click of a button)
4. SARS DA 180 tax returns (click of a button)
5. Financial reports – per facility, taxpayer and group of companies

Strong workflow, bringing together your:

1. Operations team
2. Environmental team
3. Accounting team

Built with the Xnovos design philosophy of:

1. Accuracy
2. Speed
3. Simplicity
